

WHY SELECT TWITCHY?

If a guy living with Tourettes can become a professional speaker, what's holding anyone back from achieving their dreams?

Stuart's AV Equipment Needs

**We want your performance to be 100% successful.
Correct audio-visual set-up is critical!**

Standard Audio Visual Equipment needs are as follows:

- Wireless lapel/lavaliere microphone for Stuart with extra batteries
- **MANDATORY** 40 inch or higher floor monitor
- Comfort floor monitor to be placed during day prior or 90 minutes prior tech check
- Wireless handheld microphone for running around stage and audience work
- LCD projector with laptop connection cables
- Extra length HDMI, VGA, and power cables
- To present both audio and visual requirements
- Please supply extended length mini stereo to XLR audio connection cables between my laptop and the meeting rooms p.a.
- Large screen with adequate stage space
- A black draped a/v cart to house the projector
- Stuart Ellis-Myers always brings along a back up laptop and is happy to bring along data stick or CD copy of our presentation slides
- Prop table to be black dressed with (2) pitchers of water and 4 glasses
- Please plan on handing out red paper and red clown noses to every audience seat

PLEASE HAVE YOUR AUDIO-VISUAL PEOPLE REVIEW THIS VIDEO:
